

MOCKTAR ADJIBADE TAIROU, MBA

DEVOPS & CLOUD ENGINEER | AWS | EKS | TERRAFORM | KUBERNETES | CI/CD

Greensboro, NC | 336-398-0610 | tairou.mocktar@gmail.com | linkedin.com/in/mocktar-t-69526721b | github.com/mocktar2021

100% REMOTE U.S. | AVAILABLE IMMEDIATELY | FULL-TIME | CONTRACT | CONTRACT-TO-HIRE | C2C

PROFESSIONAL SUMMARY

DevOps and Cloud Engineer with 12+ years of experience automating secure AWS and Azure infrastructure in regulated enterprise environments. Expertise includes Terraform and Terraform Cloud, Kubernetes and EKS, Argo CD, Helm, GitHub Actions, Jenkins, Python, observability, security remediation, and production support. Led PCF-to-EKS modernization, built reusable cloud modules and self-service workflows, and reduced infrastructure provisioning from days to minutes.

TECHNICAL SKILLS

Cloud and Infrastructure as Code: AWS, Azure, Terraform, Terraform Cloud, CloudFormation, Ansible, reusable modules, Sentinel, policy as code

Containers and GitOps: Kubernetes, Amazon EKS, Docker, Helm, Argo CD, OpenShift, ingress, autoscaling, health probes, RBAC

CI/CD and DevSecOps: GitHub Actions, Jenkins, GitLab CI, Azure DevOps, SonarQube, Artifactory, Checkov, tfsec, Delinea

Automation and Observability: Python, Bash, PowerShell, Linux, REST APIs, Datadog, Grafana, Prometheus, CloudWatch, Azure Log Analytics

Platforms and Data: Backstage, Databricks, MongoDB Atlas, ECS/Fargate, EC2, Lambda, RDS, EventBridge, SQS, PrivateLink

PROFESSIONAL EXPERIENCE

Senior DevOps Engineer / Application Development Advisor

Mar 2024 - Present

Cognizant | Remote

- Led enterprise modernization from PCF to Amazon EKS using Argo CD, Helm, Kubernetes, and GitOps delivery patterns across development, QA, and production.
- Engineered infrastructure and delivery controls for a distributed AI orchestration platform spanning Amazon EKS, MongoDB Atlas, Databricks, and Azure LLM endpoints.
- Built Terraform-managed EKS namespaces, service accounts, IAM roles, RBAC, ingress paths, PrivateLink connectivity, and Delinea-managed secrets for AI/ML services.
- Developed GitHub Actions and Jenkins pipelines for automated testing, artifact builds, security checks, controlled environment promotion, and repeatable component deployment.
- Administered Databricks workspaces and clusters for a Machine Learning team, including provisioning, sizing, access management, release support, and operational troubleshooting.
- Resolved readiness, liveness, non-root execution, resource quota, HPA, rollout, identity, and network issues across production EKS workloads.
- Migrated Chronology 2.0 from AEM to AWS, reducing response time from 15 minutes to under 10 seconds, and supported releases for ML-driven pharmacy applications.

PROFESSIONAL EXPERIENCE, CONTINUED

Cloud DevOps Architect

Mar 2022 - Mar 2024

Omnicom Media Group | Remote

- Designed and published 15+ reusable Terraform Cloud modules for AWS and Azure services, including Databricks, databases, Event Hubs, Service Bus, Logic Apps, Container Apps, VNET, Data Factory, Cosmos DB, S3, and EC2.
- Embedded private endpoints, diagnostic settings, Sentinel policies, tag governance, drift detection, encryption, and identity controls into reusable modules, reducing configuration errors by 40%.
- Architected a Backstage Internal Developer Platform connecting schema-validated scaffolder templates to Terraform Cloud APIs for policy-controlled, self-service AWS and Azure provisioning.
- Reduced infrastructure provisioning from days to minutes through catalog requests, template rendering, Terraform execution, approvals, and software catalog registration.
- Established module governance, versioning, security baselines, onboarding documentation, and reusable platform patterns for global engineering teams.

DevOps Engineer

Jan 2020 - Mar 2022

Annalect | Remote

- Built and operated AWS platforms across Amazon EKS, ECS/Fargate, EC2, Lambda, EventBridge, and SQS for containerized, serverless, and event-driven production services.
- Managed capacity, scaling, health checks, observability, incident response, and root-cause analysis across compute, container, and serverless components.
- Standardized CI/CD delivery with Jenkins, Terraform Cloud, and GitLab CI while enforcing least-privilege access and auditable permissions across AWS services and delivery tooling.
- Partnered with application teams from architecture through production, embedding networking, resilience, monitoring, security, and operational requirements into delivery plans.
- Produced technical documentation and led knowledge-transfer sessions for platform tooling, CI/CD practices, and operational procedures.

DevOps Engineer

Jan 2017 - Jan 2020

Infostretch | Remote

- Executed chaos engineering experiments for Fidelity Investments with Gremlin across Kubernetes, EC2, and virtual machines, using Datadog, Grafana, and CloudWatch for performance analysis.
- Engineered secure CI/CD pipelines with GitHub Actions and Jenkins, incorporating secrets management, compliance controls, and automated deployment workflows.
- Developed Ansible playbooks for repeatable hybrid-cloud provisioning and troubleshoot distributed microservices through log and performance analysis.

Linux System Administrator

Aug 2013 - Jan 2017

OCEANIX SARL | Benin

- Administered Red Hat and Ubuntu servers, LAMP stacks, HAProxy load balancers, and Apache web servers supporting enterprise applications.
- Automated access, permissions, network configuration, patching, and operations with Bash and Cron while maintaining availability and security controls.

INDEPENDENT PROJECTS

Promptflow Orchestrator | Independent AI Platform Project

- Built an independent prompt and AI orchestration platform using FastAPI, React, Tailwind CSS, MongoDB Atlas, OpenAI, Hugging Face, and Ollama.

EDUCATION

MBA, Université d'Abomey-Calavi (UAC), Benin

Bachelor's in Management, Université d'Abomey-Calavi (UAC), Benin

LANGUAGES

English, Fluent | French, Fluent
