

MOCKTAR ADJIBADE TAIROU, MBA

DEVOPS, CLOUD & AI PLATFORM ENGINEER | AWS | KUBERNETES | EKS | TERRAFORM | CI/CD | MLOPS | AI AGENTS

Greensboro, NC | 336-398-0610 | tairou.mocktar@gmail.com | linkedin.com/in/mocktar-t-69526721b | github.com/mocktar2021

100% REMOTE U.S. | AVAILABLE IMMEDIATELY | FULL-TIME | CONTRACT | CONTRACT-TO-HIRE | C2C

PROFESSIONAL SUMMARY

DevOps, Cloud, and AI Platform Engineer with 12+ years of experience designing, automating, and operating secure infrastructure across AWS and Azure. Builds Kubernetes and EKS platforms, Terraform-based cloud foundations, GitOps delivery systems, CI/CD pipelines, and internal developer platforms for regulated enterprise environments. Recent work includes Databricks administration, AI/ML workload delivery, distributed AI orchestration infrastructure, Azure LLM endpoints, PCF-to-EKS modernization, and production operations.

TECHNICAL SKILLS

Cloud Platforms: AWS: EC2, S3, VPC, RDS, Redshift, Lambda, ECS/Fargate, EKS, IAM, Route 53, CloudFront, CodeBuild, ECR, ALB, SSM; Azure: VNET, Event Hubs, Logic Apps, Container Apps, Cosmos DB, Data Factory, Databricks, database services, Private Endpoints, Entra ID

Infrastructure as Code: Terraform, Terraform Cloud, CloudFormation, Ansible, reusable modules, remote state, Sentinel, policy as code

Containers and GitOps: Kubernetes, Amazon EKS, Docker, Helm, Argo CD, OpenShift, ingress, autoscaling, health probes, RBAC

CI/CD and DevSecOps: GitHub Actions, Jenkins, GitLab CI, Azure DevOps, SonarQube, Artifactory, Checkov, tfsec, Delinea

AI/ML Platform: Databricks administration, AI/ML workload delivery, MongoDB Atlas, Azure LLM endpoints, prompt and AI orchestration infrastructure

Platform Engineering: Backstage, Internal Developer Platforms, scaffolder templates, software catalog, Nunjucks/Jinja2, JSON Schema, self-service provisioning

Automation and Observability: Python, Bash, PowerShell, REST APIs, AWS CLI, Azure CLI, Datadog, Grafana, Prometheus, CloudWatch, Azure Log Analytics

Security and Operations: IAM, RBAC, KMS, TLS, PrivateLink, network segmentation, secrets management, incident response, root-cause analysis, security remediation

Operating Systems: Red Hat Linux, CentOS, Ubuntu, Debian, Apache HTTPD, Apache Tomcat, HAProxy

PROFESSIONAL EXPERIENCE

Senior DevOps Engineer / Application Development Advisor

Mar 2024 - Present

Cognizant | Remote

- Led enterprise modernization from PCF to Amazon EKS using Argo CD, Helm, Kubernetes, and GitOps delivery patterns across development, QA, and production.
- Engineered infrastructure and delivery controls for a distributed AI orchestration platform spanning Amazon EKS, MongoDB Atlas, Databricks, and Azure LLM endpoints.
- Built Terraform-managed EKS namespaces, service accounts, IAM roles, RBAC, ingress paths, PrivateLink connectivity, and Delinea-managed secrets for AI/ML services.
- Developed GitHub Actions and Jenkins pipelines for automated testing, artifact builds, security checks, controlled environment promotion, and repeatable component deployment.
- Administered Databricks workspaces and clusters for a Machine Learning team, including provisioning, sizing, access management, release support, and operational troubleshooting.
- Resolved readiness, liveness, non-root execution, resource quota, HPA, rollout, identity, and network issues across production EKS workloads.
- Migrated Chronology 2.0 from AEM to AWS, reducing response time from 15 minutes to under 10 seconds, and supported releases for ML-driven pharmacy applications.

PROFESSIONAL EXPERIENCE, CONTINUED

Cloud DevOps Architect

Mar 2022 - Mar 2024

Omnicom Media Group | Remote

- Designed and published 15+ reusable Terraform Cloud modules for AWS and Azure services, including Databricks, databases, Event Hubs, Service Bus, Logic Apps, Container Apps, VNET, Data Factory, Cosmos DB, S3, and EC2.
- Embedded private endpoints, diagnostic settings, Sentinel policies, tag governance, drift detection, encryption, and identity controls into reusable modules, reducing configuration errors by 40%.
- Architected a Backstage Internal Developer Platform connecting schema-validated scaffolder templates to Terraform Cloud APIs for policy-controlled, self-service AWS and Azure provisioning.
- Reduced infrastructure provisioning from days to minutes through catalog requests, template rendering, Terraform execution, approvals, and software catalog registration.
- Established module governance, versioning, security baselines, onboarding documentation, and reusable platform patterns for global engineering teams.

DevOps Engineer

Jan 2020 - Mar 2022

Annalect | Remote

- Built and operated AWS platforms across Amazon EKS, ECS/Fargate, EC2, Lambda, EventBridge, and SQS for containerized, serverless, and event-driven production services.
- Managed capacity, scaling, health checks, observability, incident response, and root-cause analysis across compute, container, and serverless components.
- Standardized CI/CD delivery with Jenkins, Terraform Cloud, and GitLab CI while enforcing least-privilege access and auditable permissions across AWS services and delivery tooling.
- Partnered with application teams from architecture through production, embedding networking, resilience, monitoring, security, and operational requirements into delivery plans.
- Produced technical documentation and led knowledge-transfer sessions for platform tooling, CI/CD practices, and operational procedures.

DevOps Engineer

Jan 2017 - Jan 2020

Infostretch | Remote

- Executed chaos engineering experiments for Fidelity Investments with Gremlin across Kubernetes, EC2, and virtual machines, using Datadog, Grafana, and CloudWatch for performance analysis.
- Engineered secure CI/CD pipelines with GitHub Actions and Jenkins, incorporating secrets management, compliance controls, and automated deployment workflows.
- Developed Ansible playbooks for repeatable hybrid-cloud provisioning and troubleshoot distributed microservices through log and performance analysis.

Linux System Administrator

Aug 2013 - Jan 2017

OCEANIX SARL | Benin

- Administered Red Hat and Ubuntu servers, LAMP stacks, HAProxy load balancers, and Apache web servers supporting enterprise applications.
- Automated access, permissions, network configuration, patching, and operations with Bash and Cron while maintaining availability and security controls.

INDEPENDENT PROJECTS

Promptflow Orchestrator | Independent AI Platform Project

- Built an independent prompt and AI orchestration platform using FastAPI, React, Tailwind CSS, MongoDB Atlas, OpenAI, Hugging Face, and Ollama.
- Deployed separate API and web services through Render and Vercel, with MongoDB Atlas providing application persistence.

EDUCATION

MBA, Université d'Abomey-Calavi (UAC), Benin

Bachelor's in Management, Université d'Abomey-Calavi (UAC), Benin

CERTIFICATION HISTORY

HashiCorp Certified: Terraform Associate (002), expired March 2025

LANGUAGES

English, Fluent | French, Fluent
